## WEB APPLICATION DEVELOPER

### JOB DESCRIPTION

|              |   |          |       |
|--------------|---|----------|-------|
| Reporting to | Research and Development Team<br>Leader | Location | Derby |
|--------------|---|----------|-------|

The role of the **Web Application Developer** works within the Company the division within Roscom.

### Company Division

#### Divisional Goal

- Remain global market leaders in telecom ROI

#### Departmental Goals

- Roadmap – One new solution item release per annum that allows technology to deliver financial risk assurance to clients.
- One major software release per year per product/solution.

#### Role Purpose

This role involves updating and maintaining the Web Interface for Roscom products, developing web pages to incorporate new features, investigating new applications and technologies applicable to our product line and supporting the activities of the Roscom Research and Development department.

#### Role Responsibilities

- Software development of new features
- Investigate new technology and its suitability with regard to our existing system.
- Write baseline software to integrate new technology.
- Conform to software specifications and control changes during coding and following testing.
- Ensure back-up procedures are followed for code where required.
- Ensure code is written in a 'modular' fashion to enable a reasonable level of code re-use.
- Participate in code reviews and ensure code is suitably documented and commented.
- Perform Testing of software and hardware.
- Create technical documentation as required.
- To provide such other services as may be required by Roscom on an occasional basis, where such are not unreasonable given the employee's knowledge base and abilities.

#### Required Skills and Knowledge

CSS

JavaScript

PHP

Ajax

Excellent problem solving skills.

Good communication skills.

Be attentive to detail, especially in relation to the complexities of software and hardware.

Work well as part of a team.

#### Preferred Skills and Knowledge

HTML
